COM-5: MY OWN MOVIE

The movies have more powerful and long lasting effects on the kids. They watch movies and sometimes imitates to the main character of that movie. But we never give them a change to create their own movie. The children have wide dreaming borders unlike adults. They can produce much

more creative movies than adults. But since they don't have opportunities to create their own movie, they have to just watch, imitate movies. In this way we are narrowing their dreaming which means their creativity.

In this project we will assist the students to reveal their creativity on producing a movie. In this way they will understand that what the directors are facing and we assure that there reveal much more nicer and original movies. By doing so, students communication skills will be improved. They will be more active in participating in such projects. Also they will have self-confidence and they feel the happiness which is brought by that you create something new.

The aims of the project:

- To encourage every child to develop their creativity
- To improve the social skills and create more positive attitudes.
- To reinforce student development in their abilities.
- To encourage students to be involved in projects.
- To show the students what their ability in creativity are
- To create opportunity of sharing knowledge and experiences.
